| Optional          | MSR, RFID, Built-in battery  |
| Power supply      | Input: AC 100-240V/1.5A 50/60Hz<br>Output: DC 12V, 5A                      |
| Color             | Black  |

### Advantages of Android POS D1

1. 11.6-inch new capacitive touch screen, with better using feeling.
2. High resolution: 1366\*768 or 1920\*1080, the display is clearer.
3. Support Windows OS: J1900/Core i3/Core i5, Android OS: RK3288
4. Support 2\*20 VFD/LCD, MSR and Barcode & QR code scanner.
5. Built-in thermal receipt printer, optional 58mm or 80mm.

## Classic appearance design Function options available according to customers' needs

Perfect for use in various business scenarios including retail, restaurant, supermarket, etc.

## Professional Level of Printing Quality

Optional 58mm or 80mm specifications available,  
with faster printing speed, more stable printing quality

## Code Scanner Window and Customer Display

The code scanning window can scan various QR codes with a maximum identify speed less than 0.03 second

## Traditional cash register

Cash register was already very universal in the whole world. It is a small size traditional cashiering device with keyboard, very popular among Europe & Asia. However, it does not include any operating system or support mobile payment, not to mention apply any software.

As a result, our team referenced the traditional Cashier Register to create in design D1, a type of brand new classic intelligent cash register. Compared to traditional cash register, it is more compact & more portable, with good mobility.
